

Terra Site Constructors Names Thomas Mutchler Chief Operating Officer

Front Royal, VA - July 25, 2017 Terra Site Constructors, LLC, an industry leader in the installation of Post and Panel Walls, Sound Barrier Walls, MSE Walls, Post and Panel Walls and other C.I.P./Precast structures, is pleased to announce that Thomas Mutchler has joined the firm as Chief Operating Officer. Reporting directly to Babur R. Mian, Chairman & CEO, Mutchler will oversee the daily activities of Terra's team of experienced engineers and construction personnel to ensure efficient and effective project delivery and client satisfaction for specialty construction projects.

"I am pleased to welcome Tom to the Terra team," stated Babur R. Mian, Chairman & CEO. "Based on Tom's proven track record of success in niche construction, I am confident that his leadership will serve to further strengthen Terra's foothold in the market by advancing our mission of providing competent, innovative, reliable and cost effective construction solutions for our valued clients."

"Terra Site Constructors has a strong reputation for providing innovative solutions to non-standard construction projects with special requirements," explained Thomas Mutchler. "I look forward to working with the Terra team of seasoned professionals who are dedicated to exceeding our customers' needs and expectations."

An industry veteran with more than four decades of leadership experience in specialty construction, Mutchler holds an Associate of Applied Science degree in Civil Engineering and graduated from the Management training program at the Harvard Business School, Boston, Mass. He also holds various certifications and accreditations, and has specialized training in safety, construction and accounting.

Prior to joining Terra Site Constructors, Mutchler served as the Division Manager for the Northern Virginia division of Facchina Construction Company, Inc. Previous to that, he was the President, Owner and Head of Operations for KB Contracting, LLC, which was acquired by Facchina Construction in 2007.
